Across behavioral health professions, there is a workforce shortage of clinicians trained to provide evidence-based mental health services to older adults. Cognitive-behavioral conceptualizations have been effectively used to develop assessments and interventions for older adults and their involved family care partners. This webinar will help you apply your existing knowledge and experience with CBT to the common physical and mental health concerns of middle aged and older adults. You will develop an understanding of typical adjustments to assessment and intervention strategies while working with older adults. CBT assessment and interventions for late life depression will be used as an example, along with empirically supported CBT interventions for family caregivers of older adults. The presentation will also include resources for clinical practice with these populations.

CBT with Older Adults and Family Care Partners

Learning Objectives
At the end of this seminar, participants will be able to:

1. Describe the essential features of cognitive-behavioral conceptualizations applied to the assessment and treatment of older adults.
2. Explain the relevance of CBT-informed stepped care models of behavioral health services for older adults and their involved family care partners.
3. Identify at least 3 CBT-grounded assessment practices for older adults and involved family care partners.
4. Explain common adjustments to behavioral activation and cognitive interventions with older adults.
5. Develop a personal action plan for continued development of professional competencies in clinical work with older adults and their involved family care partners.

Begin 1 PM EST

Orientation/Overview
Demographic of Aging
Psychiatric Epidemiology of Aging
Common Presenting Concerns
Addressing intersecting identities
Step A Behavioral Health Care
Core CBT Principles and Modifications for older adults
Assessment
Suicidality
Alcohol Use
Depression
Proximal assessments within treatment (target complaints, mood monitoring)

Interventions
Aging-friendly adaptations
Behavioral Activation
Cognitive Restructuring

CBT interventions for family caregivers
Professional Development Planning

End 4:15 PM EST

Target Audience
Psychologist
Social Workers
Counselors
Teachers
Therapists
Marriage and Family Therapists
Nurses

This seminar is for intermediate to advanced level clinicians.

The Presenter

Ann Steffen, Ph.D., ABPP earned her Ph.D. in clinical psychology from Indiana University-Bloomington and was trained in interdisciplinary geriatric care teams as an intern at the VA Palo Alto Health Care System. She completed a postdoctoral fellowship in clinical geropsychology at Stanford University School of Medicine within the Older Adult and Family Center. Dr. Steffen is currently a professor of psychology and gerontology at the University of Missouri-St. Louis, where she has spent her career in teaching, research, supervision and direct clinical services focused on the needs of older adults and family caregivers. At UM-St. Louis, she has served as the director of Gerontology programs and as director of clinical training for the APA-approved doctoral program in clinical psychology. Dr. Steffen is a faculty clinician at the UM-St. Louis Community Psychological Service, and is dual board certified in Behavioral & Cognitive Psychology and in Geropsychology by the American Board of Professional Psychology (ABPP).
