One of the biggest challenges in trauma recovery is managing both when clients get emotionally overwhelmed and when clients numb out and shut down: Learning how to pace therapy and navigate clients’ emotional window of tolerance are key foundations of successful trauma treatment. In this webinar, Dr. Fatter will review the impact of traumatic stress on the brain in tangible ways to help clinicians better conceptualize how trauma alters the body’s arousal system. Dr. Fatter will discuss in detail symptoms of hyperarousal, hypoarousal and calm states of our autonomic nervous system based on Polyvagal Theory. This will help clinicians know signs of what state clients are in and help clinicians be able to educate clients about their nervous system. We will address one of the most important aspects of the therapeutic relationship based on what we know about the traumatized brain. A phase-oriented treatment approach will be presented so clinicians learn an evidence-based structure for pacing the intensity of trauma treatment. In addition, we will explore four research-informed adjunctive therapies to help clients maintain stabilization and regulate arousal.

Outline

- How Brain Research Informs Treatment
- Impact of Traumatic Stress on Brain
- 3 States of Autonomic Arousal based on Polyvagal Theory
- The Role of the Therapeutic Relationship
- Evidence-based Phase-Oriented Treatment
- Stabilization
- Trauma Processing & Grieving
- Break 12:30-12:45 PM ET
- Presence of Day Life
- Signs & Symptoms of Clients Getting Outside of their Window of Tolerance
- Four Research-Informed Adjunctive Therapies to Regulate Arousal
- Clinical Considerations for each adjunctive treatment
- Additional Resources
- End 2:15 PM ET

Our seminars are available in two formats: The first is a live, interactive webinar. If the webinar time is not convenient for you, you can purchase the Home Study version. It is a recorded version of the webinar. You will have to pass a test to earn CE’s for both the live webinar and the Home Study version.

General Information

The TZKseminars educational planning committee members and this seminar’s presenter have no relationship with a commercial interest pertinent to the content of this seminar.

Individuals with a disability or special need can go to tzkseminar.com to the Contact page to request accommodations.

This seminar has been reviewed and approved by Keith Hannan, Ph.D., Phil Rich, LCSW, and Loreen Yearick, MSN, RN: This approval expires on March 1, 2022. To cancel a registration, go to the Contact page: You will be charged $30 for any cancelled registration if you would like to file a grievance, go to tzkseminars.com and read our Grievance Policy: Then, you can file a grievance on our Contact page: You can also send a written grievance to:
