Integrating Religion and Spirituality into Psychotherapy: Ethical and Practice Considerations

Religion and spirituality are important dimensions of most individuals' lives. Yet, many mental health clinicians do not receive education and training focused on how to address these issues, when appropriate, with their clients. This webinar provides information on the roles of spirituality and religion in many clients' lives, how to address our own biases about them and how our own beliefs may impact how we view and address them, how to appropriately assess each client's treatment needs to include religious and spiritual issues, and how to approach clients' beliefs, practices, and faith communities as sources of strength that may enhance the professional services we provide. Ethics issues, challenges, and dilemmas are addressed, and an ethical decision-making model is shared and clinical examples are provided and discussed to illustrate its application. Recommendations for ethical and clinically effective practice are provided.
