

Awestruck: How the New Science of Awe Can Make Us Happier, Healthier, and More Connected

What do you feel when you gaze up at the Milky Way, see a beautiful rainbow, or stand before a mountain that seems impossibly high? This feeling – often complete with goosebumps and a shiver down our spine – is known as awe. And as it turns out, this underappreciated and often misunderstood emotion just might hold the key to a happy, meaningful, and healthy life.

Recent research has shown that awe can improve our physical health, strengthen our social bonds, and become lastingly happier. Experiences of awe strengthen our immune system, improve our psychological well-being, and even change our brain in unique ways. In this seminar, participants will explore the nature and benefits of awe, and how learning to become more awestruck can improve our psychological, physical, and social well-being. Through lecture, vignettes, and hands-on practice, you'll learn to harness these breakthrough findings and transform your clinical practice.

Our seminars are available in two formats. The first is a live, interactive webinar. You can ask questions of our presenters, either by typing them or speaking into a microphone. If the webinar time is not convenient for you, you can purchase the Home Study version. It is a recorded version of the webinar. You will have to pass a test to earn CE's for both the live webinar and the Home Study version.

Continuing Education Credit

To earn CE's, you must attend the entire webinar. No partial credit is available. For both the webinar and the home study version, you will have to pass a post-test with 80% correct and complete a seminar evaluation to earn the certificate. You can take the test up to three times. Participants will earn 3 CE's for attending once they have completed these requirements.
